

It has come to my attention that the FCC is considering an issue that would effect my ability to listen to KLOVE radio on the local low power radio transmitters. I have been listening to this station for many years in this and other areas. Unless one is interested in radio such as classic rock or (c)rap there is very limited "good" radio available. KLOVE serves this purpose to this and many other areas. It would be a disservice to all of us to lose this radio signal. Please consider this when you rule on this. Thank you.
